Subject: WP8 Action 2 - Literature Review template

Attachments: WP8_Deliverable_LiteratureReview_20171020.docx

Dear All,

According to WP8 last Webex minutes action 2:

2.	Jacek	send template for literature overview (again) to the other participants of WP8	20-10-2017	
----	-------	--	------------	--

in attachment please find a proposal for literature review. I suggest to minimize the description because nobody will be interested in reading long elaborations on the literature review.

Therefore I suggest to have just 5 rows, like written below:

SPECIFICATION	DESCRIPTION
Bibliographic data	Social Media Sentiment and Consumer Confidence: Piet J.H. Daas and Marco J.H. Puts, Statistics Paper Series No 5 / September 2014, European Central Bank
Link	https://www.ecb.europa.eu/pub/pdf/scpsps/ecbsp5.en.pdf
Short overview (strengths, weaknesses)	Facebook (10%), Twitter (80%), Linkedin messages etc. were collected from external company. Data was analyzed with R based on CSV files. The paper has a detailed description of the method used (e.g., Pearson, regression) to provide the results related to consumer confidence.
List of potential WPs interested in the paper	WP7 (sentiment analysis)
Classification (A – very relevant, B – relevant, C – less relevant)	A

As Anke wrote in minutes, we will discuss it during our next Webex meeting.

Best regards,
 Jacek
